Secretary of State Dulles completes his one-day visit with Premier de Gaulle and learns France plans to build atomic weapons whether or not it receives U.S. nuclear secrets.

Four more kidnapped American civilians and one Canadian are airlifted from a Cuban rebel hideout to the U.S. Naval Base at Guantanamo Bay. There are 37 others still in Castro's captivity.

**Premier Khrushchev** ridicules what he called the West's "orange-size" earth satellites and defied the West's system of atomic and rocket bases in a Leningrad speech. He told a mass rally of steel workers, the West is "playing with fire and trying to frighten the Soviet Union with its bases. Such tactics are extremely dangerous." They are similar to the efforts of someone trying to warm his hands by setting fire to his neighbor's house... The imperialists still hope somehow to frighten the Socialist camp with atomic weapons and rocket bases. It is time they understood how useless such calculations are..."

Continued Khrushchev – "Our Sputniks proclaim what heights are attained by the world of Socialism. These achievements can be seen without the large telescopes needed to see the orange-size Sputniks of the United States."

Won't rule on desegregation at Little Rock – The Supreme Court refuses to short cut usual procedures and rule directly on an appeal from an order suspending desegregation in Little Rock. It said it was sure the U.S. Court of Appeals in St. Louis would act on the appeals "in ample time" to permit arrangements to be made for the next school year. In another action, the court struck down a \$100 thousand fine levied against the NAACP by an Alabama judge, who imposed the fine in 1956. Circuit Judge Walter Jones imposed the fine on the ground the National Association for the Advancement of Colored People was in contempt of court for failing to comply with an order to produce a list of its members. The judge also barred the NAACP from doing business in Alabama.
